### JAPANESE GIVEN A WARM WELCOME

Seattle, Sept. 1.—The commercial commissioners sent by the chambers of commerce of six leading cities of Japan to travel through the United States to procure commerce and friendship between the two countries landed here today and received a welcome that delighted the visitors.

They have come in response to the invitation of the United Chambers of Commerce of the Pacific Coast and with the approval of the emperor of Japan, who gave a banquet to the departing commissioners.

The character of the party is shown by the presence of Baron Shibusawa, the banker and statesman; of Baron Kanda, the educator and of President Matsukata of the Kobe ship yards. Officers of the steamship Minnesota, which brought the commissioners from Yokohama, say that never in the history of Japanese, not even when Baron Komura sailed to take part in the peace negotiations at Portsmouth, has there been so spontaneous and enthusiastic a demonstration as that which attended the departure of the trade envoys from Yokohama. The entire waterfront of Yokohama was alive with flags and banners. For an hour before the Minnesota sailed the harbor resounded with bangs from thousands of cannons and with strains of American and Japanese music from native bands.

During the visit to this country the principal Japanese newspapers will print daily cables accounts of the journey through the states.

The commissioners spent the afternoon sightseeing or resting at their hotel. Tonight they were entertained at dinner on the world's fair grounds by Hayline Sta. Imperial commissioner general to the exposition. The ladies were dinner guests of Consul Tanaka and wife.

The kidneys eliminate poisons by acting as filters for the blood. When they fail in this respect serious ailments must result. Piles for the kidneys are what you should take at the first warning sign of kidney trouble. They assist the kidneys in expelling uric acid poisons. Sold by Geo. F. Cave Drug Stores.

### VICTIM OF BURNS DIES OF INJURIES

E. C. Blaylock, who was so seriously burned last week by the explosion of a gas tank, succumbed to his wounds yesterday at noon at the Ogden General hospital.

Mr. Blaylock was a stranger in Ogden and effort is being made to get in touch with his relatives, if he has any.

The body is at Richey's undertaking establishment and Mr. Richey has sent a telegram to Idaho, where it is supposed he has a sister.

If there is any one in town who knows Blaylock and can tell of any of his relatives he is asked to assist in locating them.

### FINDS NO PROPERTY.

New York, Sept. 1.—The efforts of William W. Ladd, as receiver of the New York City Railway company to recover on a judgment for \$5,271,682 against the Metropolitan Streetcar company, one of the holding companies of the Metropolitan Street Railway system, encountered an obstacle today when United States Marshal Henkle

### ORRINE CURES LIQUOR HABIT

CURE EFFECTED OR MONEY REFUNDED.

So uniformly successful has ORRINE been in restoring the victims of the "Drink Habit" into sober and useful citizens, and so strong is our confidence in its curative powers that we want to emphasize the fact that ORRINE is sold under this positive guarantee—cure effected or money refunded. Remember the guarantee is on each box.

Can be Given Secretly.

ORRINE COSTS ONLY \$1 A BOX. Guarantee in Each Box.

Write for free ORRINE booklet (mailed in plain sealed envelope) to ORRINE CO., 901 ORRINE Building, Washington, D. C.

ORRINE is sold by leading druggists everywhere.

Special Agents: BADCON'S PHARMACY

### SMALL BOY DESTROYED LETTERS AT HERMITAGE

Following the disappearance of several letters belonging to J. M. Langsdorf, a guest at the Hermitage hotel yesterday afternoon an investigation was started by Sheriff B. B. Wilson, resulting in the missing mail matter being found in an obscure part of the hotel torn into small pieces and the confession of a sixteen-year-old boy employed at the hotel, who admitted after being thoroughly "sweated" that he had stolen the letters and after finding no valuables in them attempted to destroy all evidence of his crime.

The letters were left at the hotel the afternoon before by a relative of Mr. Langsdorf. When he called for his mail yesterday, the theft was discovered. The matter was reported to Sheriff Wilson who started an investigation. From the facts gathered by the officer, suspicion was directed towards the youngster. After being questioned closely the lad admitted the theft of the letters.

The small pieces of the letters were recovered and pasted together, making it possible for the owner to read the contents. The boy was allowed to leave the city after making "many promises to reform." On account of his youthfulness his name is being withheld.

Mr. Langsdorf has been at the hotel for several days. He arrived in Ogden about a week ago from Salmon City, Idaho, where he has been engaged in the banking business.

### OGDEN BARBERS PASS STRICT EXAMINATION

The State Board of Barbers' Examiners held examinations for prospective barbers for the first time in Ogden Monday and in Provo Tuesday. In Ogden there were sixteen applicants examined and out of this number twelve were successful. In Provo there were twelve examined and nine were declared competent to shave and cut hair.

The successful ones in Ogden are: C. F. Durand, Samuel Sampson, Walter Samson, Fred Spickard, Gus Cluser, C. H. Williams, Theodore Glos, E. Edwards, E. H. Thompson, E. J. Leggett, E. H. Love, Chas. Greave, J. R. Stoddard, of Richmond, J. R. Standing of Collinston, and J. E. Clark of Coalville. The Provo shavers are Chas. Hawke of Provo, Alonzo Richmond of Santaquin, Sidney Jenkins of Nephi, W. J. Sperry of Nephi, Preston Stewart of Fairview, A. P. Anderson of Emery, G. F. Callaway of Richfield, W. H. Law of Eureka, and Herbert G. Taylor of Eureka. There were examinations in Provo to practice in the cities from which they came.

### COMPLAINT FILED BY ADMINISTRATOR MATSON

David Mattson filed an amended complaint against James Ballans yesterday and Ballans has asked for 20 days in which to plead. Mattson is the administrator of the estate of the late John Contos, and is suing Ballans for money which is due the estate for rentals. He claims that the premises at 2113 Washington avenue was rented to said Ballans and his partner, S. Dallas, for a monthly consideration of \$55. There was also a soda fountain which was being rented. Up to the time of the death of John Contos the rent had been paid, but since his death no money has been received.

Dallas sold his interest in the store to Ballans and now Mr. Mattson is suing to collect \$117.00 for the goods and chattels sold to Ballans by Contos, \$101.52 back rent and \$75 for the rent of the soda fountain.

### PARLEY MOVES OUT FOR TREASURERSHIP

It was announced last night by the friends of Parley Moyes, paying teller at the First National bank, that he would seek the nomination for city treasurer at the Republican convention. Mr. Moyes is a son of A. H. Moyes, distiller, a well-known retail merchant of Ogden, and Dan Ellis,

### McKEE'S ROCKS HORROR.

(Denver News.)

Secretary Morrison of the American Federation has asked the government to investigate low wages as well as peonage at McKee's Rocks. No time should be lost by the department of commerce and labor in complying with this request. Two presidents—Roosevelt and Taft—have boasted that publicity is the best weapon to use against the "bad" corporations. No better experiment station to test the power of publicity can be found than the plant of the Pressed Steel Car company.

Secretary Morrison rightly contends that as the company is enabled by the protective system to charge much higher prices for its products than it could without the tariff, the government has a just reason for making an investigation of the declining wage scale at McKee's Rocks.

Free trade in foreign labor and protection for products permit the industrial trusts to enslave immigrants while increasing the cost of living. It is a situation that confirms Democratic and insurgent arguments in congress, but it is to be hoped that this will lead to a more radical policy. McKee's Rock is almost a proverb for uncovering the horrors at McKee's Rocks. Publicity never had a better chance to stamp out abuses and restore hope, happiness and emancipation to victims of oppression.

Secretary Morrison insists that the rioting and needless sacrifice of life during the strike have been the direct results of "unbearable and unbelievable conditions forced upon defenseless and helpless wage workers."

"The conditions under which the employees work and live are such that they are unfit for publicity," says the pastor of St. Mary's Catholic church.

Something of the immorality caused by low wages has been told in the press from time to time. Evidently worse remains behind. Perhaps government publicity can unearth the whole truth and will dare to publish it.

Upon the stars my eyes I fix, at this, the threshold of the year, I cut out all the foolish tricks that I've used to mar my bright career. I've sold my big steam yacht—the one in which I loaded some many seas; and I shall find some other fun than dancing through the ocean breeze. My racing stables I have sold, my cellar of fine ported wine, my treasured plate of heavy gold—the simple life for me and mine! I fired the butler yesterday, the footman gave a fortnight's grace; the coachman also gets his pay, and goes to hunt another place. A trifling sum in ready cash will supply my humble needs; for meals, some beans and corned beef hash, my couch a burrow in the weeds—Emper's Gazette.

### CREAMED OYSTERS WITH CHICKEN.

Take three tablespoons of flour and two of butter, put in baker, set on stove and stir until butter and flour are thoroughly cooked, add one and one-half cups of sweet milk. Stir slowly until it thickens. Have one cup of hot-broiled chicken cut in dice, one and one-half cups of oysters, washed and drained, one cup celery cut into quarters, pieces, and celery to the sauce and let cook slowly for 15 minutes, then add chicken and oysters, cover with one cup cracker crumbs mixed with two tablespoons of melted butter; put into oven and bake until brown. Garnish with sliced stuffed olives. Season with salt and pepper to taste.

### TRICK FILES.

In a lecture on files before the Royal Photographic society of London, F. P. Smith said that with a little patience files could be trained, and he showed some cinematograph records of files living on the backs of twirling miniature dumb-bells, balancing, revolving, and themselves, climbing, revolving, wheels and acting as nursemaids. Accurately balanced little machines were used for training the files, and the only discomfort to the insect, said the lecturer, was involved in its being released, it had no desire to fly, but showed tractableness and readiness to perform these extraordinary gyrations instead.

### PREDICT ECLIPSE OF PLANET MARS

New York, Sept. 1.—An astronomical spectacle that cannot be seen again within an ordinary lifetime will occur tonight during a period of about 50 minutes. Beginning at 8:42 and 9 o'clock the planet Mars will be totally

### SALT LAKE AND STATE NEWS

#### DEMOCRATS TO PUT TICKET IN THE FIELD

Salt Lake City, Sept. 1.—Resolutions to put a Democratic ticket in the field during the coming election were adopted at a meeting of the Democratic citizens' committee Tuesday night with only one dissenting vote, that cast by J. Lindsey. Details of the time and place for the Democratic convention were to Chairman T. Lloyd and Secretary H. Haslam.

The passing of the resolution followed a general discussion of the advisability of putting a Democratic ticket in the field. Effective speeches were made by O. W. Powers, J. H. Moyle and B. H. Roberts. The meeting was held in the offices of J. H. Moyle.

Among those present were Chairman B. T. Lloyd, Secretary J. H. Haslam, B. H. Roberts, O. W. Powers, George Alder, ex-Mayor Morris, C. H. Holley, S. A. King, J. W. Korth, D. P. Felt and others.

#### DATE AMERICAN CITY CONVENTION IS FIXED

Salt Lake City, Sept. 1.—At a meeting of the city committee of the American party Tuesday, the evening of September 23 was chosen as the date of the city primary election. The evening of September 27 was chosen for the ward conventions for nomination of city councilmen. It was decided to hold the city convention on September 28.

#### MANY WOULD MARRY DENTIST.

Proposals Made While Under Influence of Gas, He Declares.

"Ugly as I am," said a dentist, "I have been proposed to by 72 women!" "Impossible!" they cried, gazing with ill-concealed repulsion on his ugliness.

"The ladies did it unconsciously," he ventured to add. "They were unconscious of the grip of gas at the time. And it was—excuse me—gastly. Fresh-drawn teeth were scattered about, and the declarations gurgled forth amid a stream of blood."

"They were all old maids. They all meant business. In vino veritas—and there is truth in gas, too. The things said in my red plush chair are the real and secret beliefs of the heart."

#### Getting Its Strength Out.

Mrs. Wickham has advertised for an experienced cook. The first applicant who came in answer to the advertisement was a stout, red-haired young woman. Mrs. Wickham pronounced several questions to her, which she answered in a fairly satisfactory manner. Then she asked her:

"How long do you boil tea?"

"Well, morn," said the young woman, "some folks boil it longer, an' some shorter. It's all a matter o' taste."

"But you do boil it, don't you?"

"Oh, yes, certainly; but I've allus thought that two hours was long enough to boil any tea. You can get all the strength out of it in that time."

—Youth's Companion.

#### Sworn Off.

Upon the stars my eyes I fix, at this, the threshold of the year, I cut out all the foolish tricks that I've used to mar my bright career. I've sold my big steam yacht—the one in which I loaded some many seas; and I shall find some other fun than dancing through the ocean breeze. My racing stables I have sold, my cellar of fine ported wine, my treasured plate of heavy gold—the simple life for me and mine! I fired the butler yesterday, the footman gave a fortnight's grace; the coachman also gets his pay, and goes to hunt another place. A trifling sum in ready cash will supply my humble needs; for meals, some beans and corned beef hash, my couch a burrow in the weeds—Emper's Gazette.

#### TRICK FILES.

In a lecture on files before the Royal Photographic society of London, F. P. Smith said that with a little patience files could be trained, and he showed some cinematograph records of files living on the backs of twirling miniature dumb-bells, balancing, revolving, and themselves, climbing, revolving, wheels and acting as nursemaids. Accurately balanced little machines were used for training the files, and the only discomfort to the insect, said the lecturer, was involved in its being released, it had no desire to fly, but showed tractableness and readiness to perform these extraordinary gyrations instead.

#### PREDICT ECLIPSE OF PLANET MARS

New York, Sept. 1.—An astronomical spectacle that cannot be seen again within an ordinary lifetime will occur tonight during a period of about 50 minutes. Beginning at 8:42 and 9 o'clock the planet Mars will be totally

eclipsed by the moon and the occultation, as the astronomers call it, will be distinctly visible to the naked eye. All over the country astronomers will watch and photograph the eclipse. They will not have any immense advantage over the laymen, however, for he, without any instrument, will be able to see the night luminary sweep across the bright shining big planet, which has been conspicuous in the sky these last few nights.

#### THE HAND MADE GENTLEMAN.

Mr. Irving Baehner has recently written a new book which he has entitled "The Hand Made Gentleman." In this work he undertakes to explain how Commodore Vanderbilt, the head of the great family of millionaires, came to be known as the "Hand Made Gentleman." The author puts the story into the common man's mouth and has him tell it in this manner: "Let me tell you a story: Bill is a fat, good-natured cuss, and wants to take it easy. I told him that I wouldn't have him loafing around, and I sent him down on the farm and put him to work there, and Bill is getting along. He played a good joke on me and he made up my mind that I'll put him in the railroad business. He says to me the other day: 'Father, I need some manure for the farm.' 'Well, boy, how much do you want?' I say: 'Seven or eight loads,' says he. 'How much I'll pay you for it?' 'A dollar a load,' says he. 'All right,' I says to him, 'come over to the car stables and get all you want at that figure.' What do you suppose the cuss does to me? He came over and got eight schooner loads of manure. At the same time he broke for the insertion of a line of explaining that 'Mr. Vanderbilt roared with laughter.' 'You're no farmer,' I says to him. 'Come right over and learn the railroad business.' But if the newspapers are to be believed, Mr. Vanderbilt did not corner all of the cleverness in the world when he took his son into a railroad office. There is a story from Tennessee that proves this assertion. Tennessee has recently 'gone dry' and it is conceded that there has been no other and similar things have been the subject of discussion at many family dinner tables. It was so at the home of a man who had two young hopefuls. During the temperance debate one evening, the elder of the boys asked his father: 'Why, father, why is it that you are so dry?' the son inquired. The father responded: 'What's hops made out of?' the son inquired. The father was endeavoring to frame an answer to this interrogation when the questioner's younger brother interjected: 'Hops is made out of hops, of course,' he said proudly. And the father let it go at that.

#### LABORATORIES FOR AEROPLANES

It is proposed in France to establish laboratories where the various practical questions connected with the operation of aeroplanes may be solved by actual experiment.

(Paris.)—The establishment of testing laboratories for aeroplanes is a pressing one. M. Painleve, a scientific authority, has often insisted on the usefulness of such establishments if aviation is to make rapid progress in France. The Eastern Aerial club has just decided on the foundation of this kind of a laboratory, which will be attached to the Physical Institute at Nancy. It is a happy initiative, for we know that the aeroplanes are being built by a number of inventors who wish to subject their ideas to experimental tests.

"In La Vie Automobile (March 6) Norbert Lalle proposes a very simple method of testing the planes of aeroplanes, which will make it possible for a person to experiment by placing himself in conditions analogous to those of actual practice, that is to say, in the flight of a steered aeroplane. In a specially arranged automobile, there are placed measuring apparatus of already existing types to register the forces of sustentation or of resistance to propulsion, the forces necessary to the re-establishment of transverse equilibrium, the forces of steering, etc., in short, all the forces which are in motion. The planes will be tested in calm air, with and against the wind, with side winds, etc. . . . The planes will not be small models a few inches square, but several meters in length. In some respects the dimensions and exact forms of those used in real aeroplanes. With such large changes in form, angle, arrangement, etc., will give results that will come out very differently and will consequently be easy to control with certainty."

The same experimental method will be applicable to the testing of aeroplanes, to the study of propellers which are now tested at a fixed point in a very defective manner, and even to the study of miniature dirigible balloons."

#### THE STORY WRITER.

The woman story writer is like a little sailless craft out in the middle of a big sea. A story is something that has to make its own way in the literary field. It has to go from place to place until it is sold or worn out. A fresh-looking manuscript stands out like a new ship. The buyer of manuscripts is exactly like a housewife in her own kitchen. The huckster comes and says: "Do you want any potatoes?" You say: "No, but have you any good meat?" So the writer often brings one article when the editor wants something else. The editor has a harder, too, and perhaps sometimes it is just as slim as old Mother Hubbard's cat. A fresh manuscript is always welcome. I get more letters regarding story writing than any other kind, and all I can say to anyone is: "Write your stories as well as you can, send them out and await results. Do not be discouraged. You will have to find your own market. You can learn more by practical work, by failures, than in any other manner."

#### TWO COMMIT SUICIDE.

New York, Sept. 1.—The police theory that Dora Winifred Hooky and Charles Shock committed suicide together received partial confirmation today when the girl's body was found in Jerome park reservoir. The couple disappeared a week ago and were last seen together.

#### TRANSFER OF COAL LANDS.

Terre Haute, Ind., Sept. 1.—The United States Steel corporation today took over the coal property, on which it had an option, from the Hammond

day by news of a duel between two of the fiercest at San Luis Potosi, in which both were desperately wounded. One was shot in the head. The other was wounded in the chest with a cable. Their identity is carefully guarded by general order.

#### WILL ENTERTAIN JAPANESE VISITORS.

Washington, Sept. 1.—Special arrangements have been made by the secretary of state for entertaining Prince and Princess Kinyoshi Kuni of Japan, who are coming to the United States, where the prince will be the personal representative of the emperor of Japan, his grandfather, at the Hudson-Fulton celebration in New York this month.

The royal Japanese visitors are passengers on the steamer Carmania, due at New York next Tuesday.

Acting on behalf of President Taft, Captain Sherwood A. Cheney, one of the president's military aides, will meet the prince and princess, and serve as their principal aides. One of the principal duties of Captain Cheney will be personally to escort the visitors to Beverly, Mass., where they will be received in special audience by President Taft on September 10.

#### POSTAL EXPENSE WILL BE REDUCED

Beverly, Mass., Sept. 1.—Postmaster General Hitchcock had an important conference with President Taft today regarding the plans he had formulated for cutting down expenses in the postal establishment. He told the president that the postal office department will show a deficit for the fiscal year ended June 30, last, of more than \$20,000,000, the largest the service has ever known. Mr. Hitchcock informed the president it was his purpose to show a material saving for the next amount every year that he has control of the department. The increase was due in part to extension of the service, to the business depression during the first part of the fiscal year, and to cumbersome and expensive methods of handling the mail.

Mr. Hitchcock has now at work in Washington a commission of experts examining the registry department, which has been working at a growing deficit. When this has been done, Mr. Hitchcock will summon another commission of money order experts.

The rural free delivery system will come next.

The subject of "franking" privileges by government officials and congressmen also will come in for a share of consideration in the effort to maintain the efficiency of the service and at the same time save money wherever a saving can be effected.

It has been practically impossible to ascertain just what the sending of "dead head" matter through the mails has cost the post office department. The custom has been to record years in Washington, however, of sending out many government documents as "registered mail." This system has been very expensive and is in part responsible for the heavy deficit of \$3,000,000 in the registry division.

#### DEFICIT OF SEVEN MILLIONS IN BUSINESS FOR AUGUST

Washington, Sept. 1.—There was a deficit of \$7,418,728 in the ordinary receipts and disbursements of the treasury department for the month of August as compared with a deficit of \$13,102,949 for July. There was also a smaller deficit in the receipts and disbursements for the construction of the Panama canal, the shortage being \$3,070,213 for July and \$2,004,127 for August.

The public debt, less the cash balance in the treasury at the beginning of business, today, was \$1,047,527,211. This does not include \$1,343,211,869 in certificates and treasury notes, which is offset by an equal amount of cash in the treasury.

The statement of the cash in the treasury shows a total of \$1,722,230,121, divided as follows:

Reserve fund, gold coin and bullion, \$159,000,000; trust funds, \$169,094,234; in national bank depositories, \$53,022,146; and in the treasury of the Philippine islands, \$5,901,271.

#### CAPTAIN CHARGED WITH SMUGGLING

Los Angeles, Calif., Sept. 1.—Captain W. Ziegenmeyer, master of the German steamer Enna, which arrived from Victoria, B. C., bound for Panama and Central American ports, was placed under arrest today on a charge of smuggling. The complaint was sworn to by officials of the custom office in Los Angeles, and alleges that Captain Ziegenmeyer and J. F. Solozano smuggled 800 Panama hats and other merchandise into this port upon the last northbound trip of the Enna. The steamer was here July 7. Captain Ziegenmeyer states that the goods were removed from the Enna after she left this port on July 7. It is alleged she was met outside by some small boat, which brought the merchandise ashore.

#### WILL NO LONGER BREAK STRIKES

Paris, Sept. 1.—Samuel Gompers, president of the American Federation of Labor, addressed the International Trade Union congress again today. He denounced international strike breaking and declared the systematic immigration of workmen in times of depression and strikes in other countries to be one of the greatest menaces of organized labor.

Mr. Gompers' proposal for organizing an international federation of workmen could not be discussed because the American Federation of labor is not affiliated with the European unions, but a British resolution of the same import was adopted. The conference then passed a resolution against workmen offering their services at times when dockmen and stoveries strike.

The conference adjourned to meet at Budapest in 1911.

#### KEEPING AHEAD OF NIPPER.

"Yes, Nipper's a good one," said Mason, trying to speak coolly of the bull terrier at his feet. "My wife and I are awfully fond of him, but we don't make fools of ourselves over him as some folks do over dogs that are not a patch on Nipper."

"He looks all right," said Rand, with as much warmth as could be expected from a man whose interest is in tumbler and pointers.

"He is all right," corrected Mason with dignity. "Why, that fellow knows everything you say to him. In German and French as well as English. We've proved it again and again, and only last night my wife said that if we wanted to keep anything from him we should have to learn a new language. 'I think,' concluded Mason, gravely, 'that we shall take up Esperanto with the evenings get longer.'—Youth's Companion.

#### FILLMORE'S PAPERS.

President Millard Fillmore's voluminous papers, covering the period immediately preceding the civil war, have been given to the Buffalo Historical society, says a Buffalo dispatch.

"At the earliest practicable moment burn or otherwise destroy effectively all correspondence of letters to or from my father, mother, sister or me."

company, and whose value is several million dollars. The larger part of the property is what has been known as the Kelly mines and lands in the Danville, Ill., district, which a few years ago sold for \$3,000,000.

#### HUMOR IN STUDENTS' PAPERS.

Some Good "Howlers" Sent to Us from England.

An article on "Examination Humor" in an English periodical called "Normal Echoes," contains some good "howlers." These are not the less interesting for coming from students in training for teachers. A criticism of William Blake that "as a child he was precocious in poetry, but in later years it developed into dogmatism" is a lesson in the art of being inartistic, while the remark that "the works of the poet are mostly Satyr" is a quaint though obvious "howler." The translation of "Caviare to the general" as "they gave the best of fish to the servant" is worth thinking out, and so is the note on Wordsworth's great line in the ode, "The winds come to me from the fields of sleep," as "found in Old Immortality, means that the winds blow across the flowers." Of course, there is something wrong proper names. There is nothing, indeed, so good as the description of Cromwell as "a man with coarse features and having a large, red nose with deep religious convictions beneath," or the case of the "lapsed man" who, having by way of exception attended church, admitted to the rector's wife that he had been to Sunday school, and learned that the rector and the rector's wife were two cities, whereas he had always thought they were man and wife.

#### HUBBARD WRITES OF MARRIAGE

In an article written to a Denver paper a few days ago Elbert Hubbard has written a very interesting article on marriage. He is a man who has been married for many years, and his experience gives him a unique point of view. He writes that marriage is a "slow living, lingering death for all." The man himself never trains on speed it is because they break fall and escape. Also, it is a very common never evolves. If the children succeed, it will continue until we recognize the equality of the sexes.

And the first move toward this equality is to give women the right of suffrage. This is necessary move for the full, free and complete development of both the man and the woman.

As long as some married men think that women have no souls, some women will agree with them. Men and women both need education, and they must be educated together.

Why not abolish the marital steam roller.

#### DAILYGRAPHS.

Why is it, when we build castles in the air, that we never think about who will get the meals and wash the dishes?

Why charms the savage, but judging from the noises that emanate from neighbors' houses, tin pans suffice for civilized folks.

The complexion of things is always changing for the married man.

#### Baby's Comb and Brush Case.

Of course baby must have her own brush and comb case, and every mother will be pleased with the pretty white linen case on which are printed the names of the baby and the date of birth. The case is made of white linen and is decorated with a pattern of small flowers. It is a very pretty and useful case for a baby's comb and brush.

#### FOR RUSSIAN BEAR PICKLE.

Cucumbers the Chief Staple, Mixed with Other Vegetables.

Eight large ripe cucumbers. Peel, remove seeds, cut in inch dice, soak in brine over night, drain, cook ten or fifteen minutes. Take six medium sized white onions, four bunches of celery, clean, cut in dice, and boil ten minutes, drain, and mix with cucumbers. Have six large green peppers diced and seeds removed. Mix through the other ingredients. Cover all with a pile of white vinegar, white sugar, a little cloves, spice, cinnamon and celery seed, tied in this muslin, add two tablespoons of grated horseradish. Pour vinegar on hot and seal in jars. This makes a delicious, dainty green and white chow.

#### KEEPING AHEAD OF NIPPER.

"Yes, Nipper's a good one," said Mason, trying to speak coolly of the bull terrier at his feet. "My wife and I are awfully fond of him, but we don't make fools of ourselves over him as some folks do over dogs that are not a patch on Nipper."

"He looks all right," said Rand, with as much warmth as could be expected from a man whose interest is in tumbler and pointers.

"He is all right," corrected Mason with dignity. "Why, that fellow knows everything you say to him. In German and French as well as English. We've proved it again and again, and only last night my wife said that if we wanted to keep anything from him we should have to learn a new language. 'I think,' concluded Mason, gravely, 'that we shall take up Esperanto with the evenings get longer.'—Youth's Companion.

#### FILLMORE'S PAPERS.

President Millard Fillmore's voluminous papers, covering the period immediately preceding the civil war, have been given to the Buffalo Historical society, says a Buffalo dispatch.

"At the earliest practicable moment burn or otherwise destroy effectively all correspondence of letters to or from my father, mother, sister or me."
